

GRAB BARS

GW11 13 04 01 Wall-floor grab bar**Product description**

90 ° angled bar with wall and floor anchorages
Right position (position considered to be in front – not user)
AISI 304 stainless steel tube of 32 mm diameter and 1.5 mm of thickness
Zinc-plated carbon steel mounting flanges with anticorrosion treatment with 2.5 mm of thickness and snap flange covers
Brushed finish
Anti-vandalism product. Heavy duty.

Technical specifications:

No built-in angle bar with three points of support located on the endings. The bar consists of an AISI 304 stainless steel tube with 32 mm of diameter and 1.5 mm of thickness. The tube is bended on “L” shape 90 degrees. The three mounting flanges are made of zinc-plated stainless steel plate with anticorrosion treatment of 2.5 mm of thickness and 75 mm of diameter. The endings of the tube and the mounting flanges are threading M10. Mounting flanges have three holes for wall attachment and snap flange covers with 0.5 mm of thickness. The brushed stainless steel assembled unit has suitable resistance to corrosion. The bar is fixed to the wall and the floor by means of 6 nylon wall plugs (10X60) and AISI 304 stainless steel screws (6X60). Grab bar will support loads in excess of 120Kg if properly installed. The total measures of the product are 780x840 mm. The grab bar code is GW11 13 04 01 manufactured by GENWEC WASHROOM S.L. – Av. Joan Carles I, 46-48 08908 L'Hospitalet de Llobregat.

Technical characteristics**Product specifications**

AISI 304 stainless steel tubing with Ø32 mm and 1,5 mm of thickness.

Zinc-plated carbon steel mounting flanges with 2.5 mm of thickness.

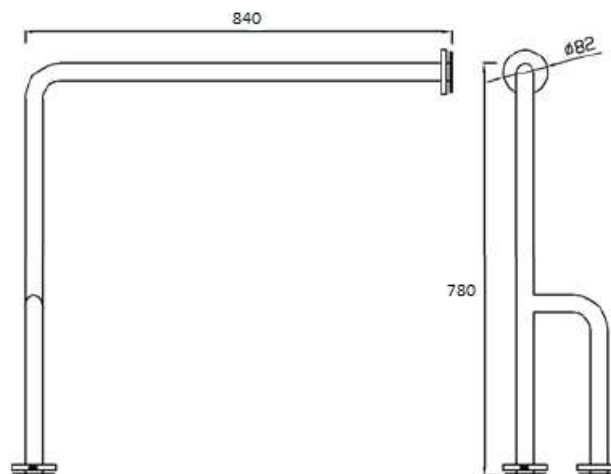

Zinc-plated carbon steel snap flange covers with 0.5 mm of thickness.

Brushed finish.

Grab bar supports 120 Kg if properly fixed.
