

Product description

Mirror with frame
Measures: 700x500 mm
AISI 304 stainless steel frame
Brushed finish

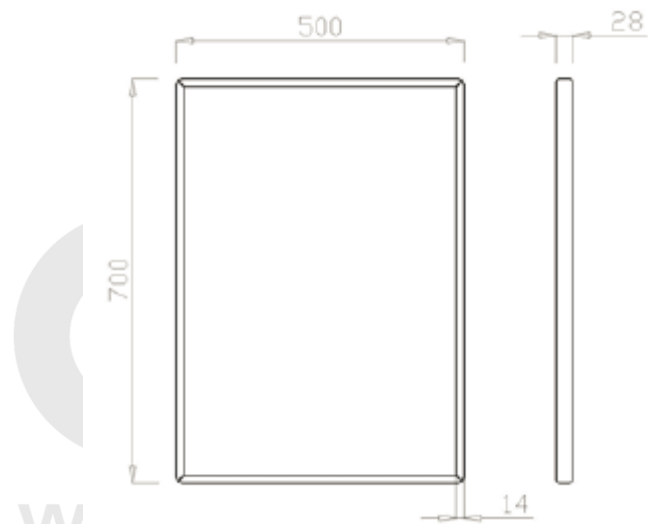

Technical specifications:

Mirror with stainless steel frame. The product is manufactured in a one-piece AISI 304 stainless steel channel frame with 90° corners. A float glass mirror, thickness 4 mm, is fixed on the interior of the channel frame. The back of the float mirror is protected against humidity. The main structure includes in its back a bracket to adjust a tilting kit (not included with the product). The frame has a brushed finish that assures resistance against corrosion. The mirror is fixed to the wall by using two wall supports included with the product. The total measures of the mirror are 700 x 500 x 28 mm. The product code is GW11.69.04.01 manufactured by GENWEC WASHROOM, S.L. - Av. Joan Carles I, 46-48- 08908 L'Hospitalet de Llobregat, Barcelona (Spain). www.genwec.com.

Technical characteristics

Product specifications

- Main structure manufactured in AISI 304 stainless steel
- 4mm float glass mirror with anti-humidity protection
- Optional tilting kit (GW11.71.04.01)
- Brushed finish
- 700x500
- Screws for wall anchoring not included

The installation is made by using two back plates that are fixed to the wall by screws. The mirror is then hanged to the two back plates. The back plates are located in the upper and lower back part of the mirror.
