

Hand Dryer NEO

Efficient and Versatile

Designed to deliver performance and reliability in everyday-use environments, the NEO hand dryer combines efficiency, hygiene, and durability in a compact format. Its robust stainless steel design and HEPA H13 filter make it a safe, sustainable, and professional-quality solution at a competitive price.

NEO

Medium traffic areas

HEPA H13 air filter

Retains 99.95% of fine particles (bacteria, viruses, dust), improving bathroom hygiene and protecting the motor for consistent performance and reduced maintenance.

Thermal limiters

The motor and heating element incorporate thermal limiters as protection components.

ADA compliant

The dryer protrudes no more than 4" (100 mm) from the wall. It complies with ADA regulations.

Professional quality at a competitive price

Efficient hand dryer with reduced consumption of 800W, 20-second drying time, and built-in HEPA H13 filter. All at a competitive price.

Drying in 20 seconds

The infrared sensor activates the dryer when hands are placed underneath the outlet. Drying lasts 20 seconds and stops when hands are removed or automatically after 30 seconds to prevent misuse.

Designed in Barcelona

Developed by our team of engineers, NEO combines efficiency and hygiene in a compact design.
